Market

General Technology trends globally:

Why?

- Technology in general creates speed and efficiency in business ops.
- Also, technology has disrupted the traditional way of doing things.
- Technology has transformed banking
(Choice of banks by consumers is driven by the extent to which a bank is innovative in tech)
-
- Therefore, Adapt or Die!

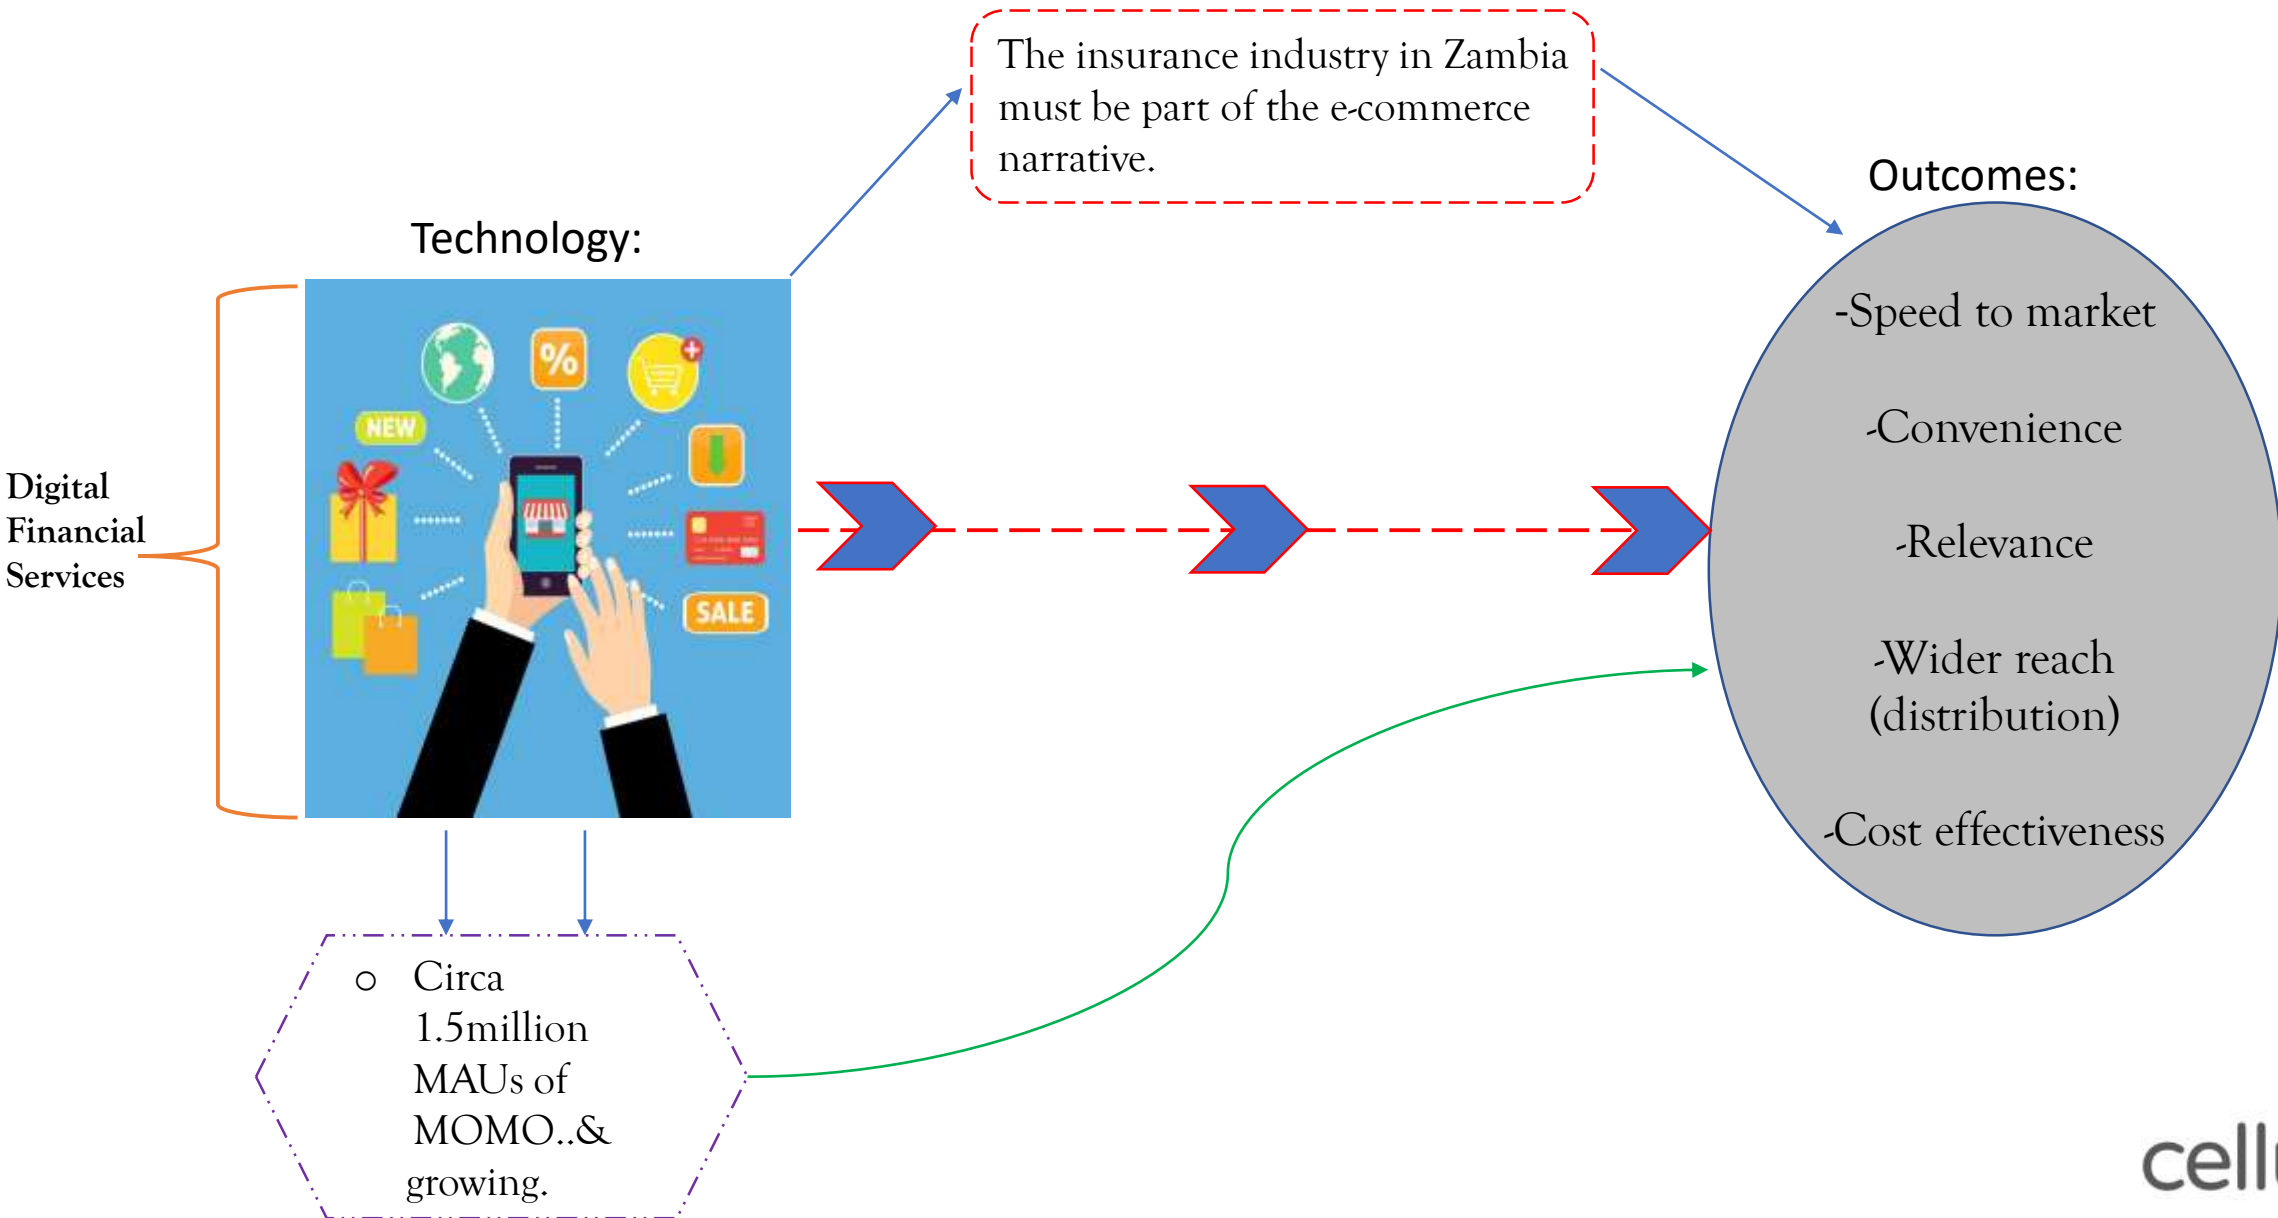

7 Disruptive technology trends: (Bain & co)

- **IT infra & productivity:** modern infra (hosted applications)
- **Online sales technologies:** digital sales channels
- **Advanced analytics:** Turning consumer insights into solutions.
- **Machine learning:** scalable IT systems to facilitate NPD. (consume APIs)
- **The Internet of Things (IOT):** everything with an IP
- **Distributed ledger technology** (Crypto currency)
- **Virtual Reality (VR):** Use VR tech in insurance

Our local context: Evolution of mobile phone tech:

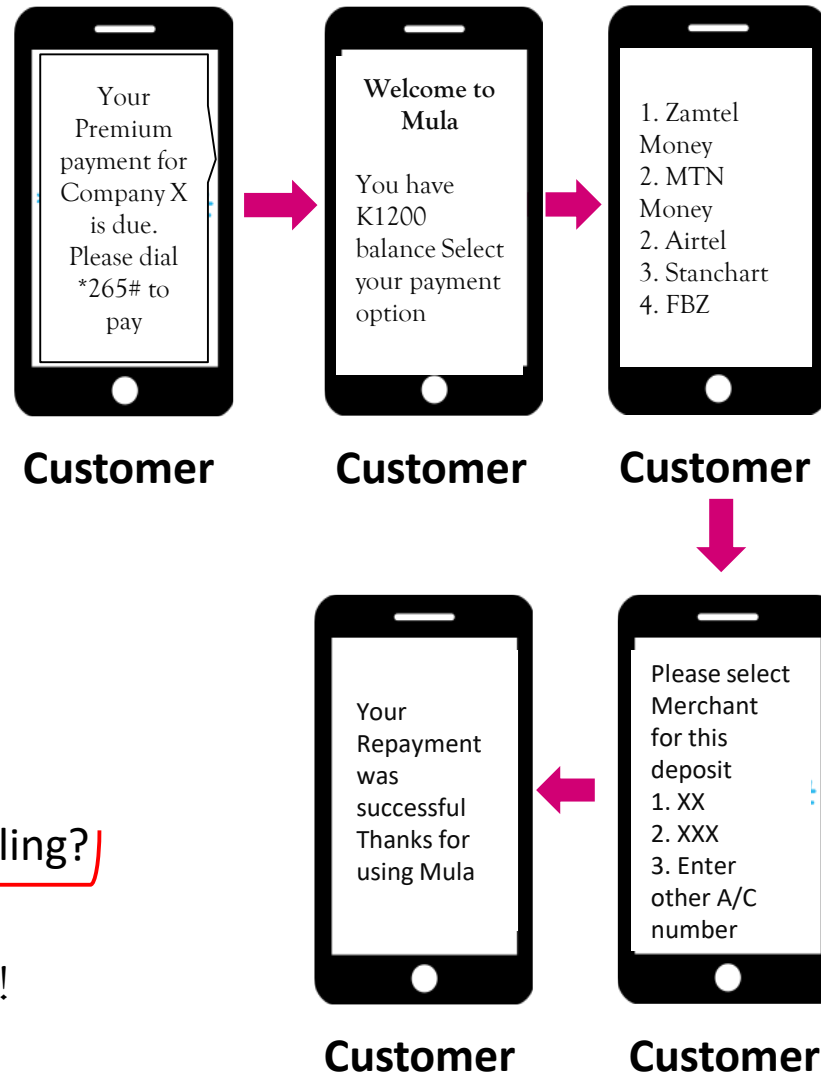

Opportunities that technology presents:

Sector Solution: Insurance Industry....

User Flow: Payment Processing

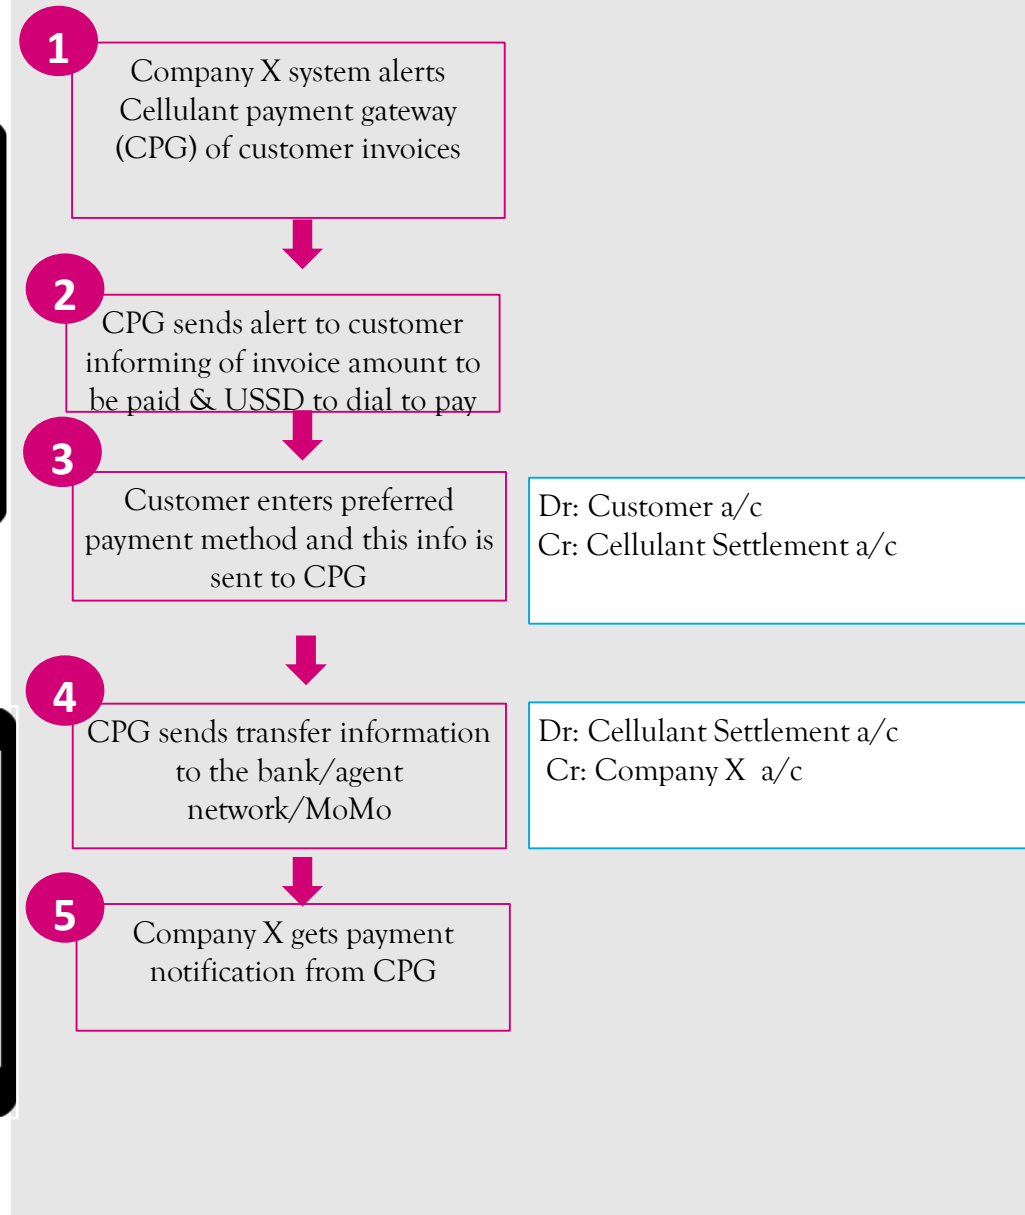

What are we selling?

Convenience!

Flow of info

Flow of money

We have sold the idea to:

Hollard.

Thank you
